Measuring energy

When you have measurements,  
you can take measures

Kuva: Motiva

At BaseN we fundamentally believe that your success is our success. We provide a complete portfolio of software service applications that monitor, measure, analyze and forecast massive data traffic flows.

By conserving energy you are contributing to the sustainability of our planet. And we have the tools that provide you with the measured results of your energy habits and consumption. With this analysis you can make a difference and save at the same time.

---

BaseN is a Finnish-based international company which is providing large-scale infrastructure measurement and management services. BaseN provides linearly scalable measurement solutions based on grid computing.

The BaseN Platform is a next generation platform that allows you to measure and gather measurement data which is arranged in a context that is relevant to your business or personal needs. The BaseN Platform displays this data in an easily understandable, concise and relevant way in real-time.
